

## Salty Lime Foam(for margaritas)

NIBBLEDISH CONTRIBUTOR

### Ingredients

- 1 cup water
- 1/2 cup lime juice
- 1/2 tsp salt
- 1/2 tsp soy lecithin granules

### Instructions

A departure from the traditional salted rim. Salt falls all over the place and you get too much in one sip but none in the next. With foam, you get a little bit of salty lime goodness with every sip. Sorry about the picture quality, this was taken with my Blackberry. By the way, this basic foam recipe can be modified any number of ways, like sugar and lemon juice for Lemon Drops.

1. Combine all ingredients into a bowl. mix with an immersion blender until a nice layer of foam forms.
2. Spoon foam onto margarita. Or Bloody Mary. Or whatever your heart desires.
